

Safer Travel Education | Presentations

Caroline's Rainbow Foundation is a registered UK charity, working to raise awareness of the importance of safer travel to anyone going travelling. We work with the education sector and other organisations to provide easily accessible and helpful information about safe travel.

We believe travel can broaden horizons. We always encourage people to 'follow their dreams' but to also recognise and prioritise life's values every step of the way.

"We wanted to speak directly to our next generation of travellers. Highlighting the potential risks involved in world travel, but also to inspire them to travel and take their opportunity to see the world."

Caroline's Rainbow Foundation's education program operates throughout the UK.

An important part of our work is to provide educational materials to young people and support teachers in raising awareness about travelling safely. Statistically, increasing numbers of young people and students in the UK are taking gap years and travelling experiences.

Through the provision of travel education and advice, we are working to equip young travellers with the essential knowledge that they need to stay safe and enjoy fantastic adventures.

Our presentations are offered primarily to Schools, Colleges and Universities. We have trained experienced travellers across the UK to facilitate these discussions in the form of talks and group sessions with students, highlighting the benefits and pitfalls of world travel.

“Richard gave a great illustrated lecture to our Sixth Form. His talk seamlessly combined the essential travel safety advice at the heart of the Foundation with inspirational accounts of his own adventures.

Students were captivated by Richard's stories and pictures of him stroking tiger cubs, white water rafting or enjoying sunset on an Australian beach, encouraging them to explore the world too. But as Richard said, much of the advice applies just as much to a trip to London or any other big city.

I would certainly invite him back to speak to the next cohort of students.”

Ben Fuller Head of Government & Politics. St Peter's School, York

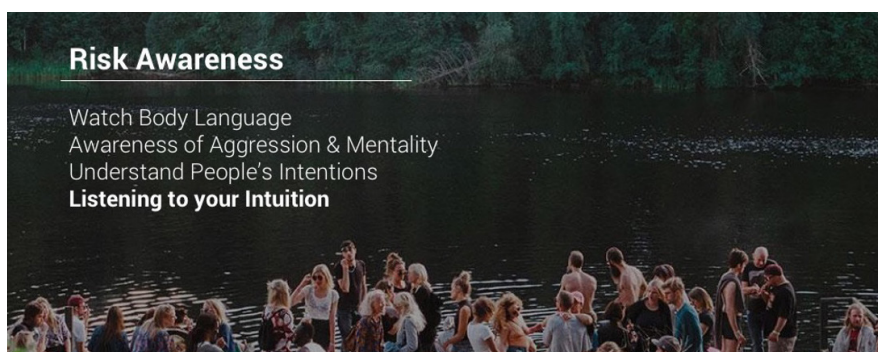

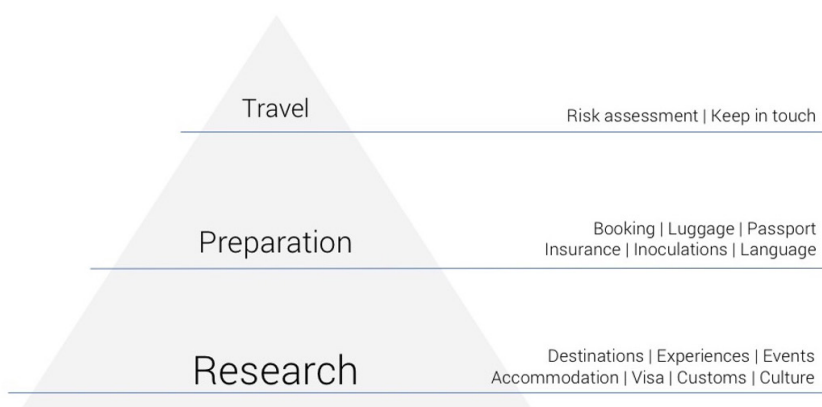

Presentation Format

Our sessions usually run for about an hour and include a 15 minute question and answer session. Although they can be tailored to the time available. The verbal presentations are accompanied by a PowerPoint presentation highlighting travel opportunities and situations the speaker has experienced, useful hints, tips and firsthand information.

The presentations are interlaced with practical visuals to show travel safety awareness strategies and risk assessments as well as preparation and research schedules.

Our aim is to stimulate and inspire students by showing them the amazing travel opportunities available to them, as well as engaging them with safety techniques and raising awareness of potential dangers.

“I think the most important message that I took from the talk is the need to prepare and plan for world travel.

There is a lot more to consider than I was initially aware but Richard outlined useful questions that could help us to prepare. Caroline's story really made me realise that travel can be amazing but that we should always take our personal safety seriously.”

Year 12 Student

Work with us to educate and empower your students to embark on their own “Safer Travel” adventures.

When
Who
and How?

“There is a real need for young people who are setting out into the world to travel, work or study abroad, to consider their safety and understand the challenges they may face. Our mission as a charity is to raise awareness and increase knowledge, by providing the tools for people to actively engage with the safety risks out there in the world.”

Find Out More

If you are interested in a presentation for your School, College, University or organisation, please get in touch.
